

Scenario Worksheet

Millie plays as a midfielder for her local football team. She attends training and matches every weekend, rain or shine. The matches are held at a different club each week, so she needs to plan how she is going to get there when her mum is unable to give her a lift. Last week she helped her football coach demonstrate a new training activity in front of her teammates.

What transferable skills can you identify?

Scenario Worksheet

Justin has been nominated Y9 house rep for his form group, which means he is responsible for organising those students in his form group to attend house competitions. He tries to work out who the best people for each event would be. He always shows up to events to cheer on his house or step in if someone does not show up. Sometimes he has to pass on messages from the Y10 house captains. At sports day, he had to help give out awards, which he found a bit intimidating as some of the students were a lot older than him.

Scenario Worksheet

Mike has recently got a new puppy after agreeing with his parents that he would be responsible for walking her everyday. He also takes her to puppy training classes on a Thursday and has to demonstrate the new skill he has been practising with her each week. Alongside his schoolwork, Mike has to fit these new responsibilities around his guitar lessons on Mondays and Wednesdays. He is having to do a lot of practise at the moment so that he is ready to perform at his school's awards evening next week.
